

Why is the internet such a huge opportunity?

- ✓ It's a revolution that's happening before our eyes.
- ✓ It's changing the way we do business forever.
- ✓ It has broken down traditional barriers
- ✓ and it's a level playing field for small business owners who compete with big boys.
- ✓ It's a low investment with massive returns

It's history repeating itself. It's like the agricultural industry versus the industrial revolution. We saw what happened in that time in history and that's what we're in right now, a revolution that will change the way every business owner will do business forever.

Money will change hands and new wealth will be created and it reaches a wider audience than traditional marketing for a fraction of the price.

It's amazing, I watch how business continue to advertise and recently I heard of one advertiser, a regional car dealer spent \$17,000 in one month on TV advertising and will struggle to get a return on his investment because of the way he did it.

Penny Wise, Pound Foolish

Yet, when it comes to the internet, most Business Owners think in pennies, yet this is the biggest wealth creator of the whole lot. But people think in pennies, not in big figures, yet they'll just burn money left, right and center, put an ad in a magazine like this and you know it will be \$1000 and there's no guarantees on the return.

Guaranteed Returns

The difference of what we do with our service is we guarantee our returns. We want to work with a business who we know can get a return on their investment, that's the first premise we do and we also guarantee the returns.

But what I'm about to show you today, if you embrace the philosophies of it whether you use our service or someone else, this will change your business forever, I guarantee that because I see it happening every day.

Massive Transformation

There is a massive transformation happening to your consumer's buying patterns and behavior and it affect your business forever at an ever increasing speed, it's accelerating in a way that is taking the average business owner by surprise.

- ✓ Who has bought stuff online?
- ✓ Who's not bought stuff online?

Everyone here has bought stuff online, so you're all up to speed with buying stuff online

The Big Question

The question is, how to make it work for my business? Would that be the question?

Okay, well hopefully today you'll have the answers.
